Open to remote roles and relocation · Turkish citizen — requires visa sponsorship for EU-based roles

SUMMARY

Flutter developer who ships to production. Independently built **Formetric** — on-device pose tracking and camera-based heart rate — and released it on the App Store and Google Play; won 1st place with it at a 2-day GenAI hackathon, then secured investment and founded a company. Previously on live puzzle games at Berry Games; now pursuing an M.Sc. in Computer Engineering.

TECHNICAL SKILLS

Mobile	Flutter (Dart), Riverpod, GetX, GoRouter, MVVM / Onion Architecture, iOS & Android store releases
Vision & Signal	Google ML Kit (Pose Detection), real-time image processing, camera PPG, FFT, Kalman filtering
Backend & Tools	Supabase (RLS), Firebase, PostgreSQL, REST / JSON, offline sync, Sentry, Git, Docker, CI/CD
Languages	Dart, Python, C# (.NET, EF Core), Java, JavaScript, C · AI tooling: Claude, Antigravity, MCP
Spoken	Turkish (native), English (B2 — EF SET certified)

EXPERIENCE

Flutter Developer — Berry Games — Sep 2025 – Jun 2026

- Flutter developer on the live puzzle games **Berry Mahjong** and **Snaptiles** (App Store & Google Play).
- Supported release management on both storefronts and ran analytics reviews to inform product decisions.

Founder & Lead Software Engineer — Musoftware (part-time) — Nov 2025 – Jun 2026

- Built Formetric from scratch; after the hackathon win, secured investment and founded Musoftware.
- Owned the full lifecycle — architecture, ML integration, CI/CD, store releases — and led market-fit analysis.

Junior Flutter Developer — Refons Technology — Jul 2025 – Sep 2025

- Optimized offline data sync and local storage on a live production app, improving reliability for the entire user base.
- Took over and advanced a field app for AKEDAŞ (state-affiliated energy distributor) employees, delivered via subcontractor Ersa, within 2 weeks — including C# API integration.

Intern — DenizBank — Nov 2022 – Jan 2023

- Gained experience in large-scale data management and secure communication protocols.

PROJECTS

Formetric — AI fitness & posture analysis — Live on App Store & Google Play

- Real-time 33-point body tracking at 26–28 FPS with Google ML Kit (MediaPipe Pose), fully on-device.
- Camera-based photoplethysmography (PPG) with FFT and Kalman filtering for ±3.2 BPM heart-rate accuracy.

Berbery & Glow — two-sided barber & salon booking platform — Closed beta · 20 active users

- Designed two separate apps (businesses and customers) covering appointments and business–customer matching, with Supabase RLS, push notifications, Sentry and KVKK compliance.

EncryptEd — AES / RSA cross-platform cryptography utility — Open source

- Built the app behind the paper “How Mathematics Works in Cryptography” — Grand Prix among 29 entries at the 61st BSUIR Scientific Conference (award credited to author Liubov Matusevich).

More on the portfolio: Mira AI (Riverpod, Supabase) · StarAura (GetX) · Petty (Supabase) · ByteFlow (Firebase)

EDUCATION

M.Sc. in Computer Engineering (thesis) — Sep 2026 – Present

Adana Alparslan Türkeş University of Science and Technology · Advisor: Ali İnan

B.Sc. in Software Engineering — Adana Alparslan Türkeş University of Science and Technology — 2021 – 2026

GPA 3.33 / 4.00

HONORS & AWARDS

1st Place — GenAI: Idea-to-Product Marathon — Çukurova University Entrepreneurship Club — Awarded Dec 2025

2-day hackathon, won with Formetric · TRY 30,000 prize and internship support from Çukurova Teknokent
